

Guy Sella has been a Quantum Applications Architect at Classiq since 2022, where he focuses on bridging advanced quantum technologies with real-world enterprise use cases. Prior to joining Classiq, Guy spent many years advising and supporting leading financial institutions in the implementation of software solutions to combat financial crime. His expertise spans fraud detection, anti-money laundering (AML), know-your-customer and compliance technologies, with a strong track record of driving innovation at the intersection of finance, data, and emerging tech.
